It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

Fusion Agent Platform and AI Agents Studio Roadmap

25B	25C (First Customer Access)	25D (Fall)	26A(January/February)
Agent Studio			
Low/no code Studio Launch Single Agent, Multiple Tools Model: Llama 3.1 70B	Single Agent, Multiple Tools, Human in the Loop (Approval) Supervisor-Worker agents pattern Model: OpenAI GPT 4.1mini, Llama 3.3 70B	Workflow “Sequential” Agents Credential Store in Studio Partner Marketplace Enhanced Debugging	Automation , HITL, and logic nodes for workflow agents, new triggers FAQ/Assistant Agent AI Agent to create Agents based on NL use case description Completion prompts and eval
Agent Platform			
FA Business Object Tool Document (RAG) Tool Send Email Tool Deep Link Tool Calculator and User Profile Tools	REST Tool access to any web service Fusion Agents can be invoked from an external resource Variables	Custom Agents and Tools Subscriptions Fusion Audit integration Common integrations and connectors (e.g Search, Integration Cloud, etc.) Environment promotion BYO LLM	Multimodal: Q&A on Images, Documents MCP Client for external MCP Servers External document sources for RAG A2A Agent Cards for Agent discoverability
Query (GET) FA Business Objects	Take Action on FA Business Objects (POST/PATCH/DELETE)		
End User Experience			
Chat and batch mode execution	English only chat interactions End user Agents catalog	Multilingual support	Upload files in chat Microsoft Teams chat
Monitoring, Evaluations, Tracing, Reporting, Observability (METRO)			
Content Moderation (EN-only)	Integrated design-time debugger	Monitoring, Evaluation, Agent Tracing Token Usage Counts	Guardrails (Prompt Injection, Content Moderation, PII) RAG Evals (grounding, answer/context rel)

Introducing

Custom AI

In addition to hundreds of embedded AI features and agents in Fusion Applications, you can now build and introduce your own.

Oracle AI Agents for every Use Case

Embedded AI: Included with Fusion Apps

- Use of pre-defined, Oracle-built AI Agent templates with basic configurations
- Unlimited use of OCI-hosted LLMs (llama, Cohere) to power Agents
- If OpenAI is used to power any agent, a generous allocation of free tokens allows customers to get started
- *“Out-of-the-box” capabilities designed for quick set-up and ease-of-use*

NEW

Custom AI: Included Tier + Customizations

- Advanced customizations or extensions to the Oracle-built AI Agent templates that change its logic, behavior, or composition
- AI agent workflows built from scratch in the Studio and deployed in production
- Bring-your-own LLM
- *Highly tailored capabilities needed for unique customer requirements*

Thank You

Simple Pricing for Custom AI: Highlights

Embedded AI

- **Still included at no cost**, no change here
- Includes Predictive AI, GenAI and embedded Oracle agents
- Minor modifications to agents possible in Studio
- Can use OpenAI LLM, subject to token limits (*see column 3*)
- Custom Agent pricing applies for major modifications, newly created agents, and bring-your-own LLM

Custom AI Agents

- **Predictable monthly fees** per user or per employee
- Not a pure consumption-based model which can be hard to budget for
- Pricing is per custom agent deployed – as each agent typically delivers significant independent value
- **No cost to develop** – subscription only required when publishing out to users

Choice of LLMs

- OCI-hosted LLMs (Llama, Cohere) are **no-charge with unlimited, unmetered use**
- OpenAI LLM available with a **generous allocation of tokens included** – always at least 100 million per month
- Additional OpenAI tokens included with any Custom Agents subscribed, and via Additional Token packs
- Additional Tokens rollover during subscription period
