AI Studio Security Setup – Post 25c Upgrade

25C Upgrade

- Received 25c but not sure how to setup Security for AI Studio?

Admin Roles by Pillar

- HCM Admin Role for AI Studio
- SCM Admin Role for AI Studio
- PRC Admin Role for AI Studio

All-Pillar Admin Role

- Single role with access across all areas

End User Access

- Basic permissions for exploring AI Agents

Why are we here?

Received 25c but not sure how to setup Security for AI Studio?

The problem is that you can't use AI Agent Studio because you don't have access to it.

Tools: AI Agent Studio

Before

Our goal is to grant the access

You can use AI Agent Studio, but there are problems when you try to test how the agent works.

Before

We want to give the access needed so the agent can run properly

Before we start...

Set Profile Option to prepare the Security Console to work with permission groups and related objects.

- Click Navigator > My Enterprise > Setup and Maintenance.
- Expand the Tasks panel tab and click Search.
- In the Search Tasks field, enter Manage Administrator Profile Values. Click the Search icon.
- In the list returned by the search, click the Manage Administrator Profile Values item.
- The Search area of the Manage Administrator Profile Values page includes a Profile Option Code field. In it, enter **ORA_ASE_SAS_INTEGRATION_ENABLED**. Click the Search button.
- A record of the **ORA_ASE_SAS_INTEGRATION_ENABLED** profile value appears. In the row for the Site profile level, select Yes in the Profile Value field.
- Click Save and Close.

Before we start...

Please run following batch jobs in sequential fashion.

Import Resource Application Security Data - Import resources from LDAP and store in Applications Security tables.

Import User and Role Application Security Data - The process copies users, roles, privileges, and data security policies from the LDAP directory, policy store, and Applications Core Grants schema to Oracle Fusion Applications Security tables. Having this information in the Oracle Fusion Applications Security tables makes the assisted search feature of the Security Console fast and reliable.

For e.g. Tools > Scheduled Processes

Pillar Specific Admin Role

Pillar: Human Capital Management

- Create a custom role to grant AI Studio Admin access for HCM & Common Objects.
- Restrict access for other pillars (SCM, CX, FIN, PRC, etc)

AI Agent Studio Admin Role for Human Capital Management

Users with Human Capital Management Application Administrator Role

1. Create a custom role and **Enable Permission Groups**

2.  Connect your custom role to:

- **Fai GenAI Agent HCM Admin Duty** (Code: ORA_DR_FAI_GENERATIVE_AI_AGENT_HCM_ADMINISTRATOR_DUTY)

Users **without** Human Capital Management Application Administrator Role

1. Create a custom role and **Enable Permission Groups**

2.  Connect your custom role to:

- **Fai GenAI Agent HCM Admin Duty** (Code: ORA_DR_FAI_GENERATIVE_AI_AGENT_HCM_ADMINISTRATOR_DUTY)
- **HCM Intelligent Agent Management Duty** (Code: ORA_HRC_HCM_AI_AGENT_MANAGEMENT_DUTY)

Creating AI Agent Admin Role for HCM

Create a custom role and enable permission groups. Please don't forget to click on **Enable Permission Groups** on the pop up window.

Enable Permission Groups

Cancel

Creating AI Agent Admin Role for HCM

To set things up simply, here's what you need to do in the **Role Hierarchy** section:

Go to the **Roles and Privileges** tab

+ Click **Add Role**

Add the **Manage HCM Intelligent Agent** duty role

- Code: `ORA_HRC_HCM_AI_AGENT_MANAGEMENT_DUTY`

Then, switch to the **Roles and Permission Groups** tab

Connect your custom role with this one:

- **Fai Genai Agent HCM Administrator** duty role
- Code: `ORA_DR_FAI_GENERATIVE_AI_AGENT_HCM_ADMINISTRATOR_DUTY`

This helps make sure your custom role has the right permissions to work with the AI agent.

Creating AI Agent Admin Role for HCM

Look for other pillars to check that the user really can't access those items

Pillar Specific Admin Role

Pillar: Supply Chain Management

- Create a custom role to grant AI Studio Admin access for SCM & Common Objects.

AI Agent Studio Admin Role for Supply Chain Management

Users with Supply Chain Application Administrator Role

1. In the Security Console, find and edit the Supply Chain Application Administrator job role.
2. In the "Basic Information" section, click on **Enable Permission Groups**

Users **without** Supply Chain Application Administrator Role

1. Create a custom role and **Enable Permission Groups**
2.  Connect following duty roles using the Role Hierarchy Section
 - **Roles and Privileges tab:**
 - SCM Intelligent Agent Management Duty (ORA_RCS_SCM_AI_AGENT_MANAGEMENT_DUTY)
 - SCM Intelligent Agent Management Duty (ORA_RCS_SCM_AI_AGENT_MANAGEMENT_DUTY_HCM)
 - **Roles and Permission Groups tab:**
 - **Fai Genai Agent SCM Administrator Duty** (ORA_DR_FAI_GENERATIVE_AI_AGENT_SCM_ADMINISTRATOR_DUTY)

Pillar Specific Admin Role

Pillar: Procurement

- Create a custom role to grant AI Studio Admin access for PRC & Common Objects.

AI Agent Studio Admin Role for Procurement

Users with Procurement Application Administrator Role

1. In the Security Console, find and edit the Procurement Application Administrator job role.
2. In the "Basic Information" section, click on **Enable Permission Groups**

Users **without** Procurement Application Administrator Role

1. Create a custom role and **Enable Permission Groups**
2.  Connect following duty roles using the Role Hierarchy Section
 - **Roles and Privileges tab:**
 - PRC Intelligent Agent Management Duty (ORA_PO_PRC_AI_AGENT_MANAGEMENT_DUTY)
 - PRC Intelligent Agent Management Duty (ORA_PO_PRC_AI_AGENT_MANAGEMENT_DUTY_HCM)
 - **Roles and Permission Groups tab:**
 - Fai Genai Agent PRC Administrator Duty (ORA_DR_FAI_GENERATIVE_AI_AGENT_PRC_ADMINISTRATOR_DUTY)

Admin Role for All Pillars

AI Agent Studio Administrator for all pillars

AI Agent Studio Admin Role for All Pillars

Users with Application Implementation Consultant Role

1. Create a custom role and **Enable Permission Groups**
2.  Connect following duty roles using the Role Hierarchy Section
 - **Roles and Permission Groups tab:**
 - Fai Genai Agent CX Administrator Duty (ORA_DR_FAI_GENERATIVE_AI_AGENT_CX_ADMINISTRATOR_DUTY)
 - Fai Genai Agent FIN Administrator Duty (ORA_DR_FAI_GENERATIVE_AI_AGENT_FIN_ADMINISTRATOR_DUTY)
 - Fai Genai Agent GRC Administrator Duty (ORA_DR_FAI_GENERATIVE_AI_AGENT_GRC_ADMINISTRATOR_DUTY)
 - Fai Genai Agent HCM Administrator Duty (ORA_DR_FAI_GENERATIVE_AI_AGENT_HCM_ADMINISTRATOR_DUTY)

Me > AI Agent Studio
(You may need to click on "show more")

Creating AI Agent Explorer Role

Please note: The Agent Explorer Role from the demo doesn't let users see all deployed agents. They will only see the agents they're allowed to access, which is usually managed at the agent team level.

Tools > AI Agent Studio > Agent
Teams > Settings Tab for the Agent
Team

The screenshot shows the 'Security' tab of the AI Agent Explorer settings. At the top, there are four tabs: 'Details', 'LLM', 'Questions', and 'Security'. Below the tabs is a '+ Add' button. The main form contains three input fields: 'Role' (highlighted with a red box and labeled 'Required'), 'Code', and 'Description'. At the bottom right, there are 'Cancel' and 'Apply' buttons.

TRAP (Token Relay And Proxy)

Special Notes on External API Authorization

Token Relay And Proxy - TRAP

Token Relay And Proxy is a feature that will allow customers to extend Fusion AI Agent Studio to invoke 3rd party REST services .

These 3rd party REST endpoints is expected to have protected access. TRAP handles the calls with the secure access.

Tool Type:
External Rest

Authorization

Functions

Authorization

Instance URL

ORACLE

AI Governance and Compliance

Oracle Cloud Center of Excellence - Product development

AI Governance

The background features a dark blue field on the left. On the right, there are large, overlapping organic shapes in orange and purple. The orange shape is filled with a fine grid of small dots and contains a pattern of small, light-colored leaf-like shapes. The purple shape is also filled with small dots. A small red square with a white circle is located in the bottom right corner.

Getting Started on your AI Governance Journey

- Organizations face a challenge on best approach to get started on their AI journey
 - Which AI features to uptake to realize value (time saved, efficiency of process, cost benefit)
 - Considerations around AI acceptable use policy
 - Compliance with impact of legislation, e.g. Colorado, New York, EU AI Act, etc.
- Playbook available based on work of the AIIIC - AI Innovation and Governance (MOS Doc ID: 3077782.1)
 - Best Practices for Building an AI Innovation & Governance Office (AIIGO)
 - Realize AI value while ensuring compliance with corporate policies and local AI rules and regulations
 - Oracle Fusion AI Use Cases
 - Details how Oracle SaaS AI Features are constructed
 - Structured to facilitate requirements of AIIGO (Scorecard, Prompt Information, Model used, etc.)
 - Enables reader to understand OOTB AI features, their purpose, and other information which will assist in governance activities leading to rapid adoption and early realization of benefits

AI Governance and Compliance – Resources Available

[AI Innovation and Governance \(Mos Doc Id: 3077782.1\)](#)

[Oracle Fusion AI Platform and Data Security Principles \(Doc ID 2991131.1\)](#)

Best Practices for Building AI Governance Office (MOS Doc ID: 3077782.1)

Best Practices for Building an AI Innovation & Governance Office

Documenting how you can set up an AI Innovation & Governance office based on real-world example, HR LOB at Oracle

- AI Innovation and Governance Office (AIIGO)
 - Structure and Logistics
 - Setting Out Group Strategy and Vision
 - Considering AI Risk & Mitigation Strategy
- Defining AI Use Cases
 - Use Case Patterns Risk Profiles - Grouping features where they exhibit similar underlying traits
 - Prioritization Approach - business value, urgency, quick wins, etc.
 - Use Case Scorecard - Legal/Compliance risk, labor relations, privacy, security. etc..
 - Use Case Review and Case Closure - detailed review of scorecard with process owner, other parties, e.g. privacy & legal, security, etc.
 - Use Case Progress Update - ongoing review to ensure actual progress is being made, identify blockers, etc.

Oracle SaaS AI Features (MOS Doc ID: 3077782.1)

AIIGO – Oracle SaaS AI Features

Documenting Oracle Fusion AI Use Cases to assist customers in their governance activities

- Fusion AI Architecture
 - Predictive AI, Generative AI, Agentic AI
 - Guardrails
 - Metric Store
- AI Models utilized
 - Cohere Command R+, Cohere embed, Meta Llama
- Fusion AI Features
 - By Fusion pillars
 - Human Capital Management, Sales and Service Cloud, Supply Chain Management
 - Patterns (author, summarize, extract, compare, Q&A)
 - Use Case Details – AI feature capability, usage, benefit, target user, other impacted parties, data source, data quality, risks, prompt outline, passed data in prompt, model used
